

World leader in vehicle
de-pollution technology

SEDA OilfilterCaps S-50147

De-pollution tool

To guarantee an environmentally friendly procedure in the de-pollution process, OilfilterCaps are a must have.

After removing the oil filter cartridge there is a chance that the remaining oil will leak. To prevent this, SEDA OilfilterCaps come to use. The caps seals the flange and stops the oil from leaking.

Also dust and dirt are prevented from getting in as well as water staying out when cleaning the engine is necessary. Especially in the resale of engines, this is an important aspect.

The caps are available in six different sizes, fitting all kinds of engines (vehicle list on the next page).

Your benefits:

- ✓ Prevents remaining oil from leaking
- ✓ Easy to mount and remove
- ✓ 6 versions in different sizes
- ✓ Fits all vehicles
- ✓ Very durable
- ✓ Proven technology
