

World leader in vehicle de-pollution technology

SEDA MDS6 Container

A-528194

Mobile de-pollution system

Your benefits:

- ✓ system
- ✓ Mobile
- ✓ Ready in minutes and easy to maintain
- ✓ Large work area and additional working aids on board
- ✓ All connections are pre-installed

The MDS6 is the newest container system of SEDA and provides an All-in-One solution for a mobile de-pollution of End-of-Life Vehicles (ELV) on the cutting edge of technology.

The SEDA MDS6 is a roll-off container in which a complete drainage system is integrated. The opened container cover functions like a roof and as rain protection. A static vehicle ramp with a capacity of up to 4 tons is installed in the container as well as catchment areas and important working aids like a workbench, tool box, etc.

The de-pollution system consists of a vacuum reservoir for brake fluid, a double diaphragm pump for petrol, diesel waste oil, coolant and washer fluid located in a simple housing, a control panel, a TankDrillingMachine, two fuel

quality controls, one swing arm for the TankDrilling-Machine and one for the waste oil funnel, a SOG², 4 hose reels (for coolant & washer fluid, air pressure and power supply (230V)) and additional supplies.

„The MDS6 is a result of experience and customer feedback. Especially the new integrated tank platform will convince car dismantlers.“

Andreas Rieser
SEDA Marketing & Sales

World leader in vehicle de-pollution technology

SEDA MDS6 Container

A-528194

Mobile de-pollution system

All required fuel lines and quick couplings are already preinstalled in the container. In addition to MDS6 SEDA offers a mobile storage TankPlatform, which is equipped with 5 high quality tanks (for petrol, diesel, waste oil, coolant & washer fluid) and can be placed in the container during the transport.

+ Your benefits:

App. 12 minutes of drainage time per car

Strong pumps and filters

Additional working aids

Preinstalled quick-couplings for tank line

TankPlatform in container

TECHNICAL DETAILS

Air pressure: 8,5 bar – 1.350 l/min
Air consumpt.: 2.900 l/car
Drainage time: app. 10-12 min/car*
Fluid drainage: Petrol: 10 l/min
 Diesel: 10 l/min
 Waste oil: 3 l/min
 Coolant fluid: 3 l/min
 Washer fluid: 5 l/m.
 Brake fluid: 3 l/min

Size (closed): 6,5 x 2,5 x 2,4 m
Size (open): 6,5 x 2,5 x 4,8 m
Weight: 4.000 kg

ORDER INFORMATION

A-528194 SEDA MDS6 Container incl. a complete de-pollution system, a vehicle lifting ramp and selected accessories.

Additional device:
N-528195 TPF5 TankPlatform with storage tanks for petrol, diesel, waste oil, washer and coolant fluid

* It depends on the car setup and in-plant flow of operations.
